

Shotgun Wedding – Indoor Nationals Stage 2 – Left Side Only: This is half of the actual CoF, the whole CoF is too large for our range.

DESCRIPTION: Shooter starts at P1 holstered to division capacity holding the rope that actuates the swinger. At the start signal pull the rope and engage the left four targets with one shot each. Once complete, move to P2 and engage the right four targets with one shot each. Best one shot will be scored.

SAFETY REMINDERS: Watch muzzle direction when moving across range.

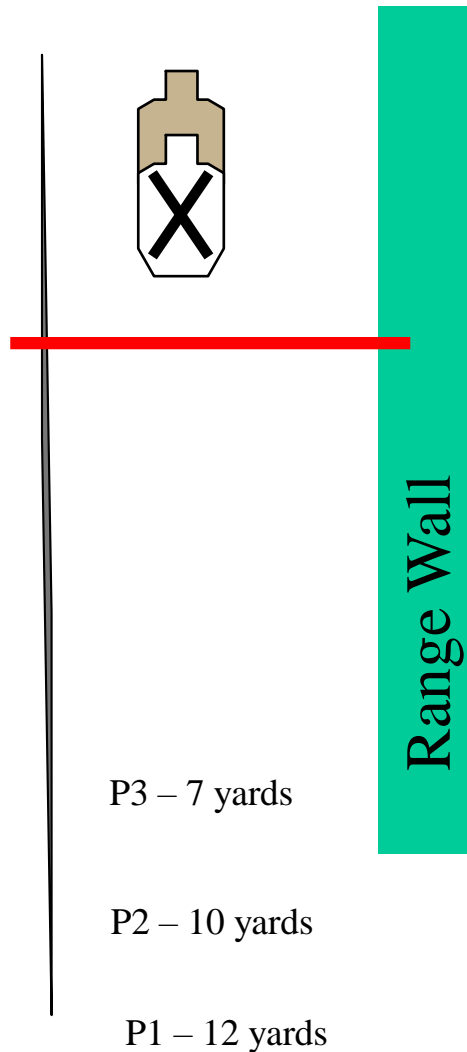

SET-UP: P1 is 13 yards from targets. On the *no-shoot – target – no-shoot trio*, the no shoot is tangent to the -0. On the *target – hard cover target – target* trios the hard cover target is on top of the outside targets and tangent to their -0. The swinger is directly in front of the center hard cover target but the threat target head is partially visible when the swinger is stopped so the hard cover target is not disappearing. May want to place barrels or chairs at P1 and P2 to mark their position. Note: CoF 2 and 4 are a single target so those CoF will only need two of the shooting lanes on the range. This will leave more than half the range for CoF 1 and 3 set up.

2013 Indoor Nationals Skill

Drill: This is an easy score killer if not careful.

DESCRIPTION: Start behind P1 loaded with six rounds and holstered with hands at sides. On the signal, draw and while engage target with 6 rounds free style. Reload with 6 rounds and engage target strong hand only behind P2. Reload and finish weak hand only with 6 rounds behind P3. All magazines loaded to six rounds.

Scoring: Best: 6 above the head perforation and 12 below the neck perforation.

SAFETY REMINDERS:

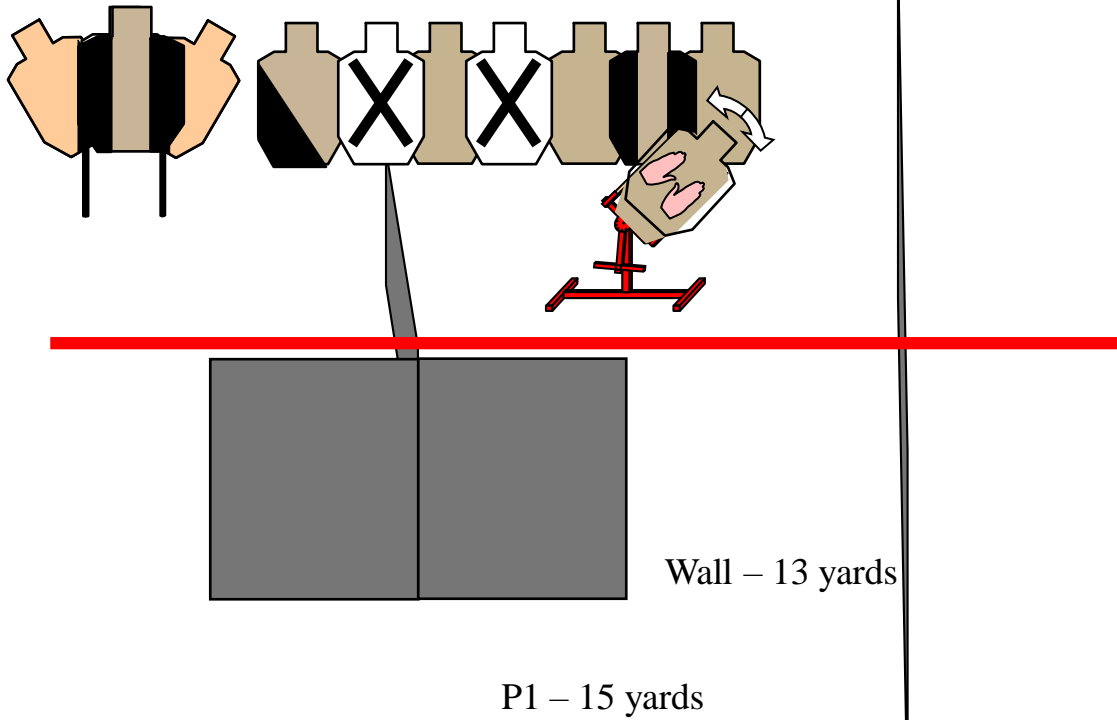

Don't trip!

SET-UP: P1 is 12 yards from target, P2 is 10 yards and P3 is 7 yards. The no-shoot target overlaps the shoot target with the top of the no-shoot head box equal to the centerline of the -0 (e.g. you can shoot into the upper half of the -0)

Because only one or two people can tape the target at a time, at S&W they made three of them. After each shooter shot, they put a new target set in the stand and brought the shot target behind the line to score/tape. I recommend that we also take this approach.

Range Wall

Shotgun Wedding – A bit different: Just don't want to have to move all the target stands

DESCRIPTION: Shooter starts at P1 holstered to division capacity holding the rope that actuates the swinger. At the start signal pull the rope, advance to cover and engage each target with two rounds from cover.

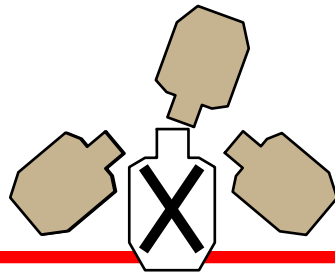

SAFETY REMINDERS: Don't Crowd Cover and do not shoot wall. Watch muzzle direction when moving across cover.

SET-UP: P1 is 15 yards from targets. Cover is two panels. On the *no-shoot – target – no-shoot* trio, the no shoot is tangent to the -0. On the *target – hard cover target – target* trios the hard cover target is on top of the outside targets and tangent to their -0. The swinger is directly in front of the center hard cover target but the threat target head is partially visible when the swinger is stopped so the hard cover target is not disappearing. A tarp must bisect the no-shoot as in the diagram so we do not shoot at oblique angles. Note: CoF 2 and 4 are a single target so those CoF will only need two of the shooting lanes on the range. This will leave more than half the range for CoF 1 and 3 set up.

Range Wall

P1 – 10 yards

2013 Indoor Nationals Stage 7: Lions: Another Standard. If you find Clowns more scary than lions, you may consider the targets Clowns.

DESCRIPTION: While pumping gas at the Sheetz station near the zoo (Circus) the escaped lions (Clowns) attack Kitty. Save her.

Standing on P1 hands relaxed at sides. Gun loaded with six rounds and holstered.

On start signal, fire 2 shots into each lion's (Clown's) body. Reload and fire one shot into each lion's (Clown's) head.

SAFETY REMINDERS: Nothing really – straightforward standards.

SET-UP: P1 is 10 yards from targets. The targets are reduced in size (e.g. the -3 had been cut off). Basically you need two stands and 4 sticks (we'll need to get four 6' sticks for this CoF). The non-threat will be suspending between the stands. Everything else tacked on around it.
