

Getting Gassed at the Rob & Shop

A variation of "Bank on it" from www.tacticalshooters.com website

You stop at the infamous Rob & Shop to get some gas while your significant other goes inside the store to buy you the 108-ounce soft drink of your choice and the bucket of nachos. All of a sudden you hear a scream notifying you that bad guys are right behind you. You are facing the gas pump with your back to the bad guys and need to seek cover before dealing with the problem.

At the buzzer shooter moves from P1 to P2. At P2 shooter may then draw his firearm and engage target with 3 rounds minimum for each target. Shooter will draw ONLY after taking cover at P2 and is facing downrange. Drawing the firearm while facing anywhere but downrange constitutes and immediate DQ from the match.

The swinger will be activated by the scorer. It should be activated after the buzzer and before the shooter takes cover. Maximum target distance is 25 ft. Standard IDPA target acquisition and use of cover applies.

18 Rounds Minimum

Vickers Count

Concealment Required
